DETAILED ACTION

Claims 1-8 and 10-22 are pending in this application and subject to the following restriction. It is noted in the amendment that claims 1, 12-16 and 20-22 indicate that they are “currently amended”. However, none of the claims have markings indicative of amendment such as strikethrough for deletions and underlining for insertions. For compact prosecution, the amendment has been considered. However, an amendment in response to this restriction should follow 37 CR 1.121.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-8 and 10-12, drawn to a method of identifying an analyte comprising providing a cell comprising a reporter gene operably linked to a regulatory region responsive to Apidicin, Trichostatin A, sodium butyrate, SAHA and MS27-275.

Group II, claims 1-8 and 10-12, drawn to a cell comprising a reporter gene operably linked to a regulatory region responsive to Apidicin, Trichostatin A, sodium butyrate, SAHA and MS27-275.

The inventions listed as Group I-II do not relate to a single general inventive concept because they lack the same or corresponding technical feature. A cell comprising a reporter gene operably linked to a regulatory sequence responsive to Apidicin, Trichostatin A, sodium butyrate, SAHA and MS27-275 is shown by Feinstein

et al (see figure 3), to lack novelty of inventive step and does not make a contribution over the prior art. Hence, the claims lack unity of invention.

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provision of MPEP 821.04. Process claims that depend for or otherwise include all the limitations of the patentable produce will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendment submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirements for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 USC 101, 101, 103 and 112. Until an elected product claim is found allowable, an otherwise proper restriction between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See “Guidance on Treatment of Product and Process Claim in light of *In re Ochiai*, *In re Brouwer* and 35 USC 103(b),” 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be

Art Unit: 1633

amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in loss of the right to rejoinder.**

Further, note that the prohibition against double patenting rejections of 35 USC 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP 804.01.

Applicant is reminded that upon cancellation of claims to a non-elected inventions, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
